```java
16  import com.app.service.IUserProfileService;
17
18  @RestController
19  @RequestMapping("/user/profile")
20  public class UserProfileController {
21
22      @Autowired
23      private IUserProfileService service;
24
25
26
27      @PostMapping("/save")
28      public ResponseEntity<String> saveUserProfile(@RequestParam String userName,
29              @RequestParam String userEmail, @RequestParam String userAddress,@RequestParam String userMobile,@Reque
30              String status="invalid";
31          try {
32
33              UserProfile userProfile = UserProfile.builder()
34              .userName(userName)
35              .userEmail(userEmail)
36              .userAddress(userAddress)
37              .userMobile(userMobile)
38              .userImage(file.getBytes()).build();
39              status = service.saveUserProfile(userProfile);
40          } catch (IOException e) {
41              e.printStackTrace();
42          }
43          return ResponseEntity<String>.status();
44
45      }
46
47  }
48
```

String cannot be resolved to a variable

5 quick fixes available:

m2 Add com.app:01_Data_JPA:0.0.1-SNAPSHOT as dependency
  Create constant 'String'
  Create local variable 'String'
  Create field 'String'
  Create parameter 'String'

Press 'F2' for focus
